SUMMARY

Currently in Master's in Complex Systems Engineering at EILCO (École d'Ingénieurs du Littoral Côte d'Opale), specialized in Data & AI. Currently completing a data analytics internship at Renault Group on connected-vehicle usage data and reliability engineering (Python, Big Data, statistical inference). At CERIMME, delivered SQL/Python pipelines that cut processing time by 35% and reduced data errors by 40%. Looking for a 6-month final-year internship (Stage PFE) starting March 2027 to bring hands-on data engineering and applied AI experience to your team.

EXPERIENCE

Data Engineer / Data Analyst Intern

Renault Group Aubevoye | June 2026 – August 2026

- Analyzed large-scale connected vehicle usage data (Python, Big Data, Data Quality) and presented insights to decision-making teams.
- Identified process optimization use cases and formalized recommendations for business teams.
- Produced management dashboards (Spotfire, advanced Excel) and documented processes for technical teams.
- Applied statistical inference methods to validate industrial quality control plans.

Data Software / Data Engineer Intern

CERIMME Casablanca | August 2024 – Sept. 2024

- Developed high-performance backend APIs using FastAPI and Python, optimizing extraction workflows by 35%.
- Automated control modules using Spring Data and SQL, reducing data anomalies by 40%.
- Designed robust architectures (Spring Boot) and wrote technical documentation to ensure maintainability.

IT Support / Junior DevOps Intern

CERIMME Casablanca | May–June 2023 | August–Sept. 2022

- Docker & CI/CD deployment: reduced production cycles by 30%.
- Linux administration & monitoring (Zabbix, SQL) ensuring backend high availability.
- Support & technical documentation facilitating the adoption of automation by business teams.

PROJECTS

- GraphRAG Knowledge Retrieval Engine** : Compared vector-search retrieval to a structured knowledge-graph approach (Neo4j, LangChain) for complex contextual reasoning, improved context relevance via PageRank.
- Revenue Drop Diagnostic Engine**: Built a multi-dimensional decomposition tool (Python, Dash, Plotly) to break down revenue drops by driver, turning raw sales data into an actionable diagnostic dashboard.

SKILLS

- AI & Data Science:** LangChain, RAG/GraphRAG, LLMs, Gemini AI, NLP, Scikit-learn, TensorFlow
- Big Data & Cloud:** Apache Spark, PySpark, Hadoop, Airflow, AWS (S3, Glue, Redshift)
- Data Engineering:** SQL, PostgreSQL, ETL/ELT, dbt, Data Quality
- Languages:** Python (Pandas, NumPy, PySpark), Java, Bash
- DevOps:** Git, Docker, CI/CD, Linux

EDUCATION

- 2025 – Present: Master's in Complex Systems Engineering, École d'Ingénieurs du Littoral Côte d'Opale, Calais, France
- 2024 – 2025: First-Year Master's (M1) in Data Science and Artificial Intelligence, Faculty of Science, Meknes, Morocco
- 2023 – 2024: Bachelor's Degree in Data Science and Artificial Intelligence, Faculty of Science, Meknes, Morocco
- 2021 – 2023: Higher Technician Certificate (BTS) in Computer Systems and Networks, Lycée Lissane Eddine Ibn Al-Khatib,

CERTIFICATIONS

STRENGTHS

- IBM** - Fundamentals of AI Agents Using RAG and LangChain
- AWS** - Cloud Technical Essentials
- IBM** - Data Engineering: Pipelines, ETL, Hadoop | Python for Data Science, AI & Development
- Google** - Agile Project Management

- Autonomy
- Rigor
- English (C1 level)
- Knowledge of Renault culture
- Ability to propose ideas/initiatives

LANGUAGES

French: C1

English: C1 Professional
